

☞ `\cal` use calligraphic uppercase font  
`\mit` use math italic font  
`\oldstyle` use old style digit font

These commands cause T<sub>E</sub>X to typeset the following text in the specified font. You can only use them in math mode. The `\mit` command is useful for producing slanted capital Greek letters. You can also use the commands given in “Selecting fonts” (p. ‘`selfont`’) to change fonts in math mode.

*Example:*

```
#{\cal XYZ} \quad
{\mit AaBb\Gamma \Delta \Sigma} \quad
{\oldstyle 0123456789}$
```

*produces:*

$\mathcal{XYZ} \quad AaBb\Gamma\Delta\Sigma \quad 0123456789$
