

## 1

`\mathchar`  $\langle mathcode \rangle$

This command produces the math character whose class, family, and font position are given by  $\langle mathcode \rangle$ . It is only legal in math mode.

*Example:*

```
\def\digger{\mathchar "027F} % Like \spadesuit in plain TeX.  
% Class 0, family 2, font position "7F.  
$\digger$
```

*produces:*
