

`\smallbreak`

`\medbreak`

`\bigbreak`

These commands indicate increasingly desirable places for T<sub>E</sub>X to break a page. They also cause T<sub>E</sub>X to insert a `\smallskip`, `\medskip`, or `\bigskip` (p. ‘`\smallskip`’) if the page break doesn’t actually happen. T<sub>E</sub>X suppresses this skip if it occurs just after an equal or larger skip.
