

`\downbracefill`

`\upbracefill`

These commands respectively produce upward-pointing and downward-pointing extensible horizontal braces. T<sub>E</sub>X will make the braces as wide as necessary. These commands are used in the definitions of `\overbrace` and `\underbrace` (p. ‘`\overbrace`’).

*Example:*

```

$$\begin{array}{c} \text{\texttt{\$}\hbox to 1in{\downbracefill}\quad} \\ \text{\texttt{\hbox to 1in{\upbracefill}}\text{\texttt{\$}}} \end{array}$$

```

*produces:*
