```
\' acute accent as in é
```

\. dot accent as in n

\' grave accent as in è

 $\$  tilde accent as in  $\tilde{a}$ 

∖c cedilla accent as in ç

\d underdot accent as in r

\H Hungarian umlaut accent as in ő

\t tie-after accent as in ûu

\u breve accent as in ř

\v check accent as in ŏ

These commands produce accent marks in ordinary text. You'll usually need to leave a space after the ones denoted by a single letter (see "Spaces", p. 'spaces').

## Example:

Add a soup\c con of \'elan to my pin\"a colada. produces:

Add a soupçon of élan to my pinã colada.
