1

\parfillskip   [⟨*glue*⟩ parameter]

This parameter specifies the horizontal glue that T<small>E</small>X inserts at the end of a paragraph. The default value of \parfillskip is 0pt plus 1fil, which causes the last line of a paragraph to be filled out with blank space. A value of 0pt forces T<small>E</small>X to end the last line of a paragraph at the right margin.
