1

\mkern ⟨*mudimen*⟩

This command produces a kern, i.e., blank space, of width ⟨*mudimen*⟩. The kern is measured in mathematical units, which vary according to the style. Aside from its unit of measurement, this command behaves just like \kern (p. '\kern') does in horizontal mode.

Example:

    $0\mkern13mu 0 \qquad {\scriptscriptstyle 0 \mkern13mu 0}$

produces:

    0 0   ₀ ₀
